Internal API documentation: Automatically generated API documentation that describes packages, classes, methods and parameters in the source code. The grammar for SQL (as implemented in Derby) and ij is also described in BNF.

Apache Derby: Documentation
Scheduler¶. The Airflow scheduler monitors all tasks and all DAGs and triggers the Task instances whose dependencies have been met. Behind the scenes, it spins up a subprocess, which monitors and stays in sync with a folder for all DAG objects it may contain, and periodically (every minute or so) collects DAG parsing results and inspects active tasks to see whether they can be triggered.
