Clean the battery connection if the engine will not turn over. Remove the negative (-) or ground cable first, then the positive (+) cable. Clean the posts and cables with a pocket knife. If the cables are damaged or split, it might be a good time to replace them. Replace the battery, starting with the positive cable then the negative one.

Basically, when these injectors begin to fail, they pull too many amps. In turn the ECM will set this code. Also, the number 1 reason for this failure to happen is the injector has overheated due to a failed oil spray. There is a hole in the rocker arm assembly that squirts oil on the injector to cool it.

With the CAT C7 the B50 rating of 450,000-500,000 miles. This means half of the CAT C7 engines had a major engine failure at 500,000 miles and needed an overhaul. According to the B Rating System an "overhaul" or "major engine repair" is regarded as removal of the cylinder heads and/or dropping the oil pan with an inframe repair. Failures or parts replacement without removing the cylinder heads or dropping the oil pan are not counted in the B10 and B50 engine life statistics.
