### Cats

The cat (*Felis catus*) is a domestic species of small carnivorous mammal. It is the only domesticated species in the family Felidae and is often referred to as the domestic cat to distinguish it from the wild members of the family. A cat can either be a house cat, a farm cat or a feral cat; the latter ranges freely and avoids human contact. Domestic cats are valued by humans for companionship ...

### Cat - Wikipedia

Cat, domesticated member of the family Felidae, order Carnivora, and the smallest member of that family. Like all felids, cats are characterized by supple low-slung bodies, finely molded heads, long tails that aid in balance, and specialized teeth and claws that adapt them to a life of active hunting.

Cats acquire the larval life-stage as parasites when lying on the ground or walking in a suitable habitat. In temperate areas, cats and other animals acquire the larvae during the summer and fall. In warmer areas, infestation occurs throughout the year. The tiny larvae attach to the host, feed for a few days, and leave when engorged. At this ...

Veterinarians routinely recommend certain vaccines for all cats (called core vaccines) whereas others are used more selectively according to the cat's environment and lifestyle. Vaccines work by stimulating the body's immune system to recognize and fight a particular microorganism such as a virus, bacteria, or other infectious organism.
