LEAF DICHOTOMOUS KEY ANSWERS

Lab 11 Animal Behavior Introduction:
Ethology is the study of animal behavior.
An animal's behavior is its response to
sensory input. There are three types of
behaviors: orientation, agonistic, and
mating. Orientation behaviors take the
animal to its most favorable
environment. Taxis is when an animal
moves toward or away from a stimulus.

Asked for: its classification. Strategy: Decide whether a substance is chemically pure. If it is pure, the substance is either an element or a compound. If a substance can be separated into its elements, it is a compound. If a substance is not chemically pure, it is either a heterogeneous mixture or a homogeneous mixture.

3.3: Classifying Matter According to Its Composition ...

- You want to use a classification key (also called a dichotomous key).
- A classification key asks a question and gives you two answers.
- The answer you select takes you to another question until you finally identify the lizard. Look at an example of a classification (dichotomous) key: 1a.
