Paul Foerster wrote the best 2nd year algebra textbook I have ever examined or taught from. As a trained physicist and mathematician with an unusual and delightful sense of humor, Foerster develops the algebra by developing and illustrating the algebra skills in the context of functions. His applications are real-world, meaty and meaningful.

It's here - the recommended sequel to the Jacobs math series. Paul Foerster taught math beginning in 1961 and puts his teaching expertise to work in this text which is designed as a course in intermediate and advanced algebra and trigonometry. After completing algebra 1 and geometry, this book is the next step before calculus. The presentation emphasizes the role of algebra and trigonometry as the foundation for calculus and should take a student 1 ½ to 2 years for completion.
