general relativity an extension of special relativity to a curved spacetime. The third key idea is that mass (as well as mass and momentum flux) curves spacetime in a manner described by the tensor field equations of Einstein. These three ideas are exemplified by contrasting GR with Newtonian gravity. In the

Introduction to Tensor Calculus for General Relativity

This general relativity textbook helps students develop a solid mastery of both the physics and the supporting tensor calculus. The unique workbook-based design fosters active-learning by explaining key concepts before guiding students through working out the processes. More than 350 additional problems support students' learning.
