the height, width, and depth of an object in a single view. The most common type of pictorial drawing used in the drafting industry is the isometric drawing. An isometric drawing is a view in which all three axes appear at equal 120° angles with the plane of projection. See Figure 3A-1. This supplement

A lesson on isometric drawing. Hopefully you like it. I use the isometric dotted paper but the lesson could easily be adapted to use the isometric grid. There is a need to have multi link blocks for this lesson or something similar as the lesson is highly interactive with the blocks. Isometric paper included to print off.

The isometric is one class of orthographic projections. (In making an orthographic projection, any point in the object is mapped onto the drawing by dropping a perpendicular from that point to the plane of the drawing.) An isometric projection results if the plane is oriented so that it makes equal angles (hence "isometric," or "equal measure") with
