HP DNS Configuration and Management Manual—529432-001 v About This Manual This manual describes how to implement Domain Name System (DNS) 9.2.3 on NonStop Server in the HP NonStop Open System Services (OSS) environment. For general information about DNS 9.2.3, see the BIND 9 Administrator Reference Manual in the NonStop Technical Library (NTL).

## **DNS Configuration and Management Manual**

DNS or Domain Name System is the basic requirement of any kind of network. DNS works in client-server mode, where DNS client may call a computer or domain name string, and DNS server will help the client to perform name-to-IP address mapping so further TCP/IP actions can be performed by the client. Without DNS server, the client has to call the IP address directly instead of the name string.
