the deeper is the ocean floor at that point. Oceanographers use the formula: $D = \frac{1}{2} v * t$, where D is the ocean depth, v is the speed of sound in water (5,806 ft./sec), and t for the time interval in seconds

Mapping the Ocean Floor Worksheet (page 1)

Access Free Mapping Ocean Floor Activity Answers

The formula to find the ocean floor depth is $D = \frac{1}{2} t \cdot v$. In the formula, D stands for depth, t for time between sending and receiving, and v for the speed of sound in water. The speed of sound in water is 1,454 meters per second. The table below gives you some more sonar sounding data.
